Consolidated Financial Statements December 31, 2007

(A Development Stage Entity)

Management's Responsibility for Consolidated Financial Statements

The accompanying consolidated financial statements of Wescan Goldfields Inc. are the responsibility of management and have been approved by the Board of Directors.

Management has prepared the consolidated financial statements in conformity with Canadian generally accepted accounting principles. The consolidated financial statements include some amounts that are based on best estimates and judgments.

The management of the Company, in furtherance of the integrity and objectivity of data in the consolidated financial statements, has developed and maintains a system of internal accounting controls. Management believes the internal accounting controls provide reasonable assurance that financial records are reliable and form a proper basis for preparation of consolidated financial statements and that assets are properly accounted for and safeguarded.

The Board of Directors carries out its responsibility for the consolidated financial statements through its audit committee, the majority of which are outside directors. The audit committee reviewed the Company's annual consolidated financial statements and recommended their approval to the Board of Directors. The shareholders' auditors have full access to the audit committee, with and without management being present.

The shareholders' auditors, KPMG LLP, Chartered Accountants, in accordance with Canadian generally accepted auditing standards, have examined these consolidated financial statements and their independent professional opinion on the fairness of the consolidated financial statements is attached.

AUDITORS' REPORT

To the Shareholders of Wescan Goldfields Inc.

We have audited the consolidated balance sheets of Wescan Goldfields Inc. as at December 31, 2007 and 2006 and the consolidated statements of loss and comprehensive loss and deficit and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2007 and 2006 and the results of its operations and its cash flows for the years then ended in accordance with Canadian generally accepted accounting principles.

WESCAN GOLDFIELDS INC.

(A Development Stage Entity)

Notes to the Consolidated Financial Statements (years ended December 31, 2007 and 2006)

1. Nature of operations

Wescan Goldfields Inc. was originally incorporated as Shore Resources Inc. under the Business Corporations Act of Alberta on January 17, 2003 and by amended articles dated April 2, 2004 changed its name to Wescan Goldfields Inc. (“Wescan” or the “Company”). Substantially all of the Company’s efforts are directed to the exploration and development of its mineral properties and the Company is considered to be in the development stage with respect to its current mineral property holdings.

2. Significant accounting policies

Basis of presentation

These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles. Generally accepted accounting principles require that management make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year.

Areas of significance requiring the use of management estimates relate to the determination of the recoverability of capitalized mineral exploration costs and the determination of future income tax assets and liabilities. Actual recovered amounts could differ from those estimates.

The following accounting policies are considered to be significant:

Consolidation principles

The consolidated financial statements include the accounts of the Company and its subsidiary. Interests in joint ventures are accounted for by the proportionate consolidation method.

Cash and cash equivalents

Cash and cash equivalents includes cash and investments that, upon acquisition, have an initial term to maturity of three months or less. Cash and cash equivalents are designated as held-for-trading (“HFT”) and are carried at fair value.

Mineral properties

Subject to compliance with provincial mineral regulations, the Company holds the right to explore for and develop mineral resources on various Crown property dispositions within the Province of Saskatchewan. These rights are classified as mineral properties for financial statement purposes.

All costs related to the acquisition, exploration and development of mineral properties are capitalized. Upon commencement of commercial production from a property, the related accumulated costs are amortized against future income of the project using the unit-of-production method over estimated recoverable ore reserves. Interest on debt associated with the acquisition and development of mineral properties is capitalized until commencement of commercial production. There have been no interest costs capitalized to date. Management periodically assesses carrying values of non-producing properties and if management determines that the carrying values cannot be recovered or the carrying values are related to properties that are allowed to lapse, the unrecoverable amounts are expensed.

WESCAN GOLDFIELDS INC.

(A Development Stage Entity)

Notes to the Consolidated Financial Statements (years ended December 31, 2007 and 2006)

The recoverability of the carried amounts of mineral properties is dependent on the existence of economically recoverable ore reserves; the ability to obtain the necessary financing to establish the existence of ore reserves and to complete the development of such ore reserves and the success of future operations. The Company has not yet determined whether any of its mineral properties contain economically recoverable reserves. Amounts capitalized as mineral properties represent costs incurred to date, less write-downs and recoveries, and does not necessarily reflect present or future values.

When options are granted on mineral properties or properties are sold, proceeds are credited to the cost of the property. If no future capital expenditure is required and proceeds exceed costs, the excess proceeds are reported as a gain.

Property and equipment

Property and equipment purchases are recorded at cost and amortized using the declining balance method except for leasehold improvements, which are amortized on a straight-line basis over a term equal to the remaining life of the current lease agreement plus one renewal term. Annual amortization rates are as follows:

Automotive equipment	30%
Computer equipment	30%
Computer software	100%
Furniture and equipment	20%

Future income taxes

Future income tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying value of existing assets and liabilities and their respective tax bases. Future income tax assets and liabilities are measured using enacted and substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are to be recovered or settled. The effect on future income tax assets and liabilities of a change in rates is recognized in earnings in the period which includes the enactment date. Future income tax assets and liabilities are recorded in the financial statements if realization is considered more likely than not. The valuation of future income taxes is adjusted, if necessary, by the use of a valuation allowance to reflect the estimated recoverable amount.

Flow-through shares

The Company finances a portion of its exploration activities through the issue of flow-through shares. The Company renounces the deductions to investors and accordingly records share issue costs related to the future tax liability of the temporary difference arising from the renunciation. As a result, share capital is reduced and future income tax liabilities are increased by the estimated tax benefits when renounced by the Company to the investors, except to the extent that the Company has unused tax benefits on loss carryforwards and tax pools in excess of book values available for deduction that are more likely than not to be realized against which a valuation allowance has been provided. In these circumstances, the future tax liability reduces the valuation allowance, if any, and the reduction is recognized in earnings.

Per share amounts

Basic per share amounts are calculated using the weighted average number of shares outstanding during the period. Diluted per share amounts are calculated based on the treasury-stock method, which assumes that any proceeds received on the exercise of options and warrants would be used to purchase common shares at the average market price during the period. The weighted average number of shares outstanding is then adjusted by the net change.

WESCAN GOLDFIELDS INC.

(A Development Stage Entity)

Notes to the Consolidated Financial Statements (years ended December 31, 2007 and 2006)

Stock-based compensation

The Company has a share option plan that is described in note 5 (g).

Options granted under the share option plan are accounted for using the fair-value method. Under this method, the fair value of stock options granted is measured at the estimated fair value at the grant date and recognized over the vesting period. When forfeitures occur during the period in which a stock option vests no further amounts are recognized. Consideration received on the exercise of stock options is recorded as share capital and the related contributed surplus is transferred to share capital.

Recently adopted accounting standards

Financial instruments

On January 1, 2007, the Company adopted Canadian Institute of Chartered Accountants (“CICA”) handbook sections relating to financial instruments and comprehensive income. These adoptions had no impact on the Company’s opening deficit. The Company had no “other comprehensive income or loss” transactions during the year ended December 31, 2007 and no opening or closing balances for accumulated other comprehensive income or loss.

Under the new standards, financial assets and financial liabilities are initially recognized at fair value and their subsequent measurement is dependent on their classification as described below. Their classification depends on the purpose for which the financial instruments were acquired or issued, their characteristics and the Company’s designation of such instruments. The standards require that all financial assets be classified either as held-for-trading, available-for-sale, held-to-maturity, or loans and receivables. The standards require that all financial assets, including all derivatives, be measured at fair value

New accounting pronouncements

Financial instruments and comprehensive income

Effective January 1, 2008, the Company will adopt new CICA handbook sections relating to financial instrument presentation and disclosure. These sections are intended to enhance the users’ ability to evaluate the significance of financial instruments to an entity, related exposures and the management of these risks. The implementation of this guidance is not expected to have a material impact on the Company’s financial position and results of operations.

Capital disclosures

During 2007, the CICA issued new accounting standards relating to capital disclosures. This additional disclosure will include quantitative and qualitative information regarding an entity’s objectives, policies and processes for managing capital. This Section is applicable for the Company’s fiscal year beginning January 1, 2008 and is not expected to have a material impact on the Company’s financial disclosures.

a) Fork Lake/Jasper/Tamar Property

The Company holds a 100% interest in the Fork Lake/Jasper/Tamar property, consisting of certain mineral dispositions located approximately 150 kilometers northeast of La Ronge, Saskatchewan.

b) Mud Lake Property

In the second quarter of 2007, Wescan entered into an option agreement with Alto Ventures Ltd ("Alto"). Under the terms of the agreement, Wescan has an exclusive and irrevocable option to acquire an undivided 50% interest in Alto's Mud Lake property by making \$600,000 in exploration expenditures and issuing 150,000 Wescan shares to Alto over a two year period. As at December 31, 2007, Wescan has incurred \$227,449 of exploration expenditures and has issued 50,000 shares to Alto in accordance with the terms of the option agreement.

c) Munro Property

The Company holds a 51% interest in the Munro property, consisting of certain mineral dispositions located approximately 128 kilometers northeast of La Ronge, Saskatchewan.

d) Jojoy Property

The Company holds a 100% interest in the Jojoy property, consisting of certain mineral dispositions located approximately 150 kilometers northeast of La Ronge, Saskatchewan. The Company acquired the original 25% property interest in 2004 from its then parent company, Shore Gold Inc. On October 24, 2006, the Company acquired the remaining 75% property interest in a non-cash exchange for 3,500,000 shares valued at \$1,365,000.

WESCAN GOLDFIELDS INC.

WESCAN GOLDFIELDS INC.

(A Development Stage Entity)

Notes to the Consolidated Financial Statements (years ended December 31, 2007 and 2006)(a) Common shares

In June 2007, the Company issued 50,000 shares fair valued at \$17,000 as part of the Wescan - Alto Ventures Ltd. Mud Lake Option Agreement. (see note 3b)

(b) Common shares

In July 2007 the Company issued 3,888,750 flow-through shares for gross proceeds of \$1,555,500. The shares issued require that the Company make certain qualifying expenditures for tax purposes on or before December 31, 2008; the deduction of which flows through to the shareholder.

(c) Warrants

On certain issues of common shares, the Company has issued warrants with the common shares entitling the holder to acquire additional common shares of the Company. A summary of the outstanding warrants is as follows:

	Warrants	Average Price
Balance - December 31, 2005	4,298,814	\$0.30
Issued	2,958,214	0.45
Exercised	(2,371,509)	0.36

Balance - December 31, 2006	2,958,214	\$0.45
Issued	-	-
Exercised	-	-
Expired	(2,958,214)	0.45
Balance - December 31, 2007	-	\$ -

No warrants were issued in 2007. The warrants issued in 2006 were fair-valued at \$101,467. The fair value of the warrants issued in 2006 was determined using the Black-Scholes option-pricing model with the following assumptions: volatility 52%, risk-free rate of return of 3.92%, expected dividend of 0%, and expected term of 1 year.

(d) Common shares

In December of 2006 the Company issued 5,916,428 units for gross proceeds of \$2,070,049. Each unit consisted of one common share and one-half of one common share purchase warrant. Each common share purchase warrant entitles the holder to acquire one common share at an exercise price of \$0.45 for a period of 12 months from the closing date.

(e) Common shares

In October of 2006 the Company issued 3,500,000 shares valued at \$1,365,000 for a 75% interest in the Jojay gold deposit. (see note 3d)

(f) Broker warrants

On certain issues of common shares, the Company issued broker warrants as partial consideration to the agent for services associated with the share issuance. Each broker warrant entitles the agent to acquire one common share of the Company for a period of 12 months from closing. A summary of the outstanding broker warrants is as follows:

WESCAN GOLDFIELDS INC.

Exercised	-	-
Expired	(66,194)	0.45
Balance - December 31, 2007	181,938	\$0.40

The broker warrants outstanding expire July 18, 2008.

The broker warrants issued in 2007 were fair-valued at \$5,313 (2006 - \$1,489). The fair value of the broker warrants was determined using the Black-Scholes option-pricing model with the following assumptions: volatility of 46% (2006 - 43%), risk-free rate of return of 4.64% (2006 - 3.92%), expected dividend of 0% (2006 - 0%), and expected term of 1 year (2006 - 1 year).

(g) Share option plan

The Company has established a share option plan whereby options may be granted to directors, officers and key employees to purchase up to an aggregate of 10% of the issued and outstanding shares of the Company. As at December 31, 2007, the number of shares reserved under the plan is 2,288,392. Options granted have an exercise price of not less than the market price (on the date of grant) of the common shares on the stock exchange on which the shares are traded. Options granted vest from date of grant to twenty-four months after grant date and expire 5 years from the date of the grant of the options.

During 2007, the Company granted 1,535,000 (2006 - 2,550,000) options to officers, directors, consultants and employees. The fair value of these options was determined using the Black-Scholes option-pricing model with the following assumptions:

	2007	2006
Number of options granted	1,535,000	2,550,000
Average strike price	\$0.32	\$0.61
Expected dividend	-	-
Expected volatility	44.67%	35.8%
Risk-free interest rate	4.40%	4.27%
Expected life of options	5.00	5.00
Weighted average grant date fair values	\$189,342	\$524,625

The fair value of the options granted during 2007, using the Black-Scholes option-pricing model was \$189,342 (2006 - \$524,625). The fair value attributable to options granted during the year and vested was \$87,237 (2006 - \$321,130). Of this amount, \$ nil (2006 - \$12,683) was capitalized as an addition to mineral properties and \$87,237 (2006 - \$308,477) was expensed with a corresponding increase of \$87,237 (2006 - \$321,130) to contributed surplus. The fair value of options vested and expensed during 2007 was \$256,958 (2006 - \$308,447).

(h) Contributed surplus

The fair-value of stock options and broker warrants has been determined using the Black-Scholes option-pricing model. The fair-value on the vesting of these securities is added to contributed surplus. Upon exercise, the corresponding amount of contributed surplus related to the security is removed from contributed surplus and added to share capital. A summary of the contributed surplus activity is as follows:

	2007	2006
Balance – beginning of year	\$ 496,427	\$ 245,016
Fair value of options vested	262,926	342,337
Fair value of broker warrants granted	5,313	1,489
Less: contributed surplus related to options exercised	-	(39,930)
Less: contributed surplus related to options forfeited	(5,968)	(21,207)
Less: contributed surplus related to broker warrants exercised	-	(31,278)
Balance – end of year	\$ 758,698	\$ 496,427

Notes to the Consolidated Financial Statements (years ended December 31, 2007 and 2006)**6. Per share amounts**

Basic loss per common share is computed by dividing net loss applicable to common shares by the weighted average number of common shares issued and outstanding for the relevant period. Diluted loss per common share is computed by dividing net loss applicable to common shares by the sum of the weighted average number of common shares issued and outstanding and all additional common shares that would have been outstanding if potentially dilutive common shares had been issued. The calculation of loss per share amounts is based on the following:

	2007	2006
Numerator:		
Loss applicable to common shares	\$1,046,802	\$575,517
Denominator:		
Weighted average common shares outstanding	60,840,598	49,968,075
Basic and diluted loss per common share	\$ 0.02	\$ 0.01

Excluded from the calculation of diluted loss per common share were the effects of outstanding options and warrants as the effect on basic loss per share would be anti-dilutive.
