

WESCAN GOLDFIELDS INC.

**3rd Quarter Report
September 30, 2020**

MANAGEMENT'S DISCUSSION & ANALYSIS ("MD&A")

The following discussion and analysis is prepared by Management as of November 24, 2020 and should be read in conjunction with the unaudited condensed interim consolidated financial statements for the quarter ended September 30, 2020 ("financial statements for the quarter ended September 30, 2020"), as well as the audited consolidated financial statements and annual MD&A for the year ended December 31, 2019 available on SEDAR at www.sedar.com. Wescan Goldfields Inc. ("Wescan" or "the Company") prepared its financial statements for the period ended September 30, 2020 in accordance with International Accounting Standard ("IAS") 34 *Interim Financial Reporting* using accounting policies consistent with the International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"). All currency amounts are quoted in Canadian Dollars, unless otherwise stated.

Overview

The Company is assessing future options for its portfolio of gold properties in the La Ronge Gold Belt in northern Saskatchewan. No exploration programs were carried out during the nine months ended September 30, 2020. Due to the global COVID-19 pandemic, the Government of Saskatchewan waived expenditure requirements for the current term and subsequent twelve months for active mineral claims and leases. As a result, the Company is no longer required to incur expenditures on certain of the Company's mineral properties during 2020 to keep these claims in good standing. The Company will also continue to evaluate the potential for the acquisition of other mineral properties that fit the Company's strategic direction.

Financial Highlights

Select financial information of the Company for the three and nine months ended September 30, 2020 and 2019 is summarized as follows:

	Three Months Ended September 30, 2020 \$	Three Months Ended September 30, 2019 \$	Nine Months Ended September 30, 2020 \$	Nine Months Ended September 30, 2019 \$
Interest and other income	-	69	11	276
Net loss	7,268	7,285	44,294	50,022
Net loss per share ⁽¹⁾	0.00	0.00	0.00	0.00
Total assets	74,091	172,364	74,091	172,364
Working capital	58,472	154,216	58,472	154,216

(1) Basic and diluted.

Results of Operations

For the quarter ended September 30, 2020 the Company recorded a net loss of \$7,268 (\$0.00 per share) compared to \$7,285 (\$0.00 per share) for the same period in 2019.

Expenses

Total operating expenses for the quarter ended September 30, 2020 were \$7,268 compared to \$7,354 for the same period of 2019. The decrease was primarily due to lower exploration and evaluation expenditures incurred, offset by higher administration

expenses incurred during the quarter ended September 30, 2020 compared to the same period in 2019.

Administration expenses incurred for the quarter ended September 30, 2020 were \$7,268 compared to \$6,881 for the same period in 2019. Costs in the administration category relate to amortization, office and equipment rent, regulatory requirements and other office related expenses.

During the quarter ended September 30, 2020, the Company did not incur exploration and evaluation expenditures (compared to \$473 during the same period in 2019). The expenditures incurred in 2019 related to a field exploration program on the Company's Munro Lake gold property.

Financing

No financing activities occurred during the quarters ended September 30, 2020 and September 30, 2019.

Year to Date

Results of Operations

For the nine months ended September 30, 2020, the Company recorded a net loss of \$44,294 (\$0.00 per share) compared to a net loss of \$50,022 (\$0.00 per share) for the same period in 2019. This \$5,728 decrease was primarily the result of lower exploration and evaluation expenditures incurred during the nine months ended September 30, 2020 compared to the same period in 2019.

Expenses

Total expenditures for the nine months ended September 30, 2020 were \$44,305 compared to \$50,298 for the same period of 2019. This decrease of \$5,993 is primarily due to lower exploration and evaluation expenditures.

During the nine months ended September 30, 2020, the Company incurred exploration and evaluation expenditures of \$200 (2019 - \$7,695). The expenditures incurred in 2019 related to a field exploration program on the Company's Munro Lake gold property.

Administration expense increased to \$43,569 for the nine months ended September 30, 2020 compared to \$42,603 for the same period in 2019. Costs in the administration category also relate to amortization, office and equipment rent, regulatory requirements and other office related expenses.

Corporate development costs increased to \$536 for the nine months ended September 30, 2020 compared to \$0 for the same period of 2019.

Financing

No financing activities occurred during the nine months ended September 30, 2020 and September 30, 2019.

Summary of Quarterly Results

	2020			2019				2018
	Qtr 3 \$	Qtr 2 \$	Qtr 1 \$	Qtr 4 \$	Qtr 3 \$	Qtr 2 \$	Qtr 1 \$	Qtr 4 \$
Net income (loss) ⁽¹⁾	(7,268)	(20,161)	(16,865)	(51,973)	(7,285)	(25,747)	(16,990)	(11,371)
Net income (loss) /share ⁽²⁾	0.00	(0.00)	(0.00)	(0.00)	0.00	(0.00)	(0.00)	(0.00)
Shares outstanding	45,084,320	45,084,320	45,084,320	45,084,320	45,084,320	45,084,320	45,084,320	45,084,320

(1) Net loss for the second and fourth quarters of 2019 were higher due to higher exploration and evaluation expenditures incurred. The remaining quarters reflect normal operations of the Company.

(2) Basic and diluted.

Related Party Transactions

During the nine months ended September 30, 2020, Mr. Kenneth E. MacNeill (Chief Executive Officer), through his consulting company, waived his management fees. Total compensation paid to key management personnel, including amounts paid or payable to related parties owned by key management personnel, executive officers and directors, was \$0 (2019 - \$0).

Liquidity

The Company currently has no ongoing source of revenue and, as such, is dependent upon the issuance of new equity to finance its ongoing obligations and to advance its exploration properties. Although the Company has been successful in the past in obtaining financing, there can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favorable. Failure to obtain additional financing could result in delay or indefinite postponement of further exploration and development of its projects with the possible loss of such properties.

As at September 30, 2020, the Company had working capital of \$58,472 as compared to \$102,398 at December 31, 2019. Included in the working capital at September 30, 2020 are payables and accrued liabilities of \$13,538 (December 31, 2019 - \$15,662).

While the existing working capital is sufficient to fund the minimum expenditures the Company must incur to sustain its mineral claims and operations beyond 2020, the ability of the Company to continue as a going concern and fund general and administrative expenses in an orderly manner will require further equity issuances or other forms of financings. There is no assurance that the Company will be successful in obtaining required financing at an acceptable cost as and when needed or at all. As such, there is a material uncertainty that casts significant doubt about the Company's ability to continue as a going concern.

Capital Resources and Outstanding Share Data

As at September 30, 2020 the Company had 45,084,320 shares outstanding as well as 4,190,000 options with a weighted average exercise price of \$0.06. As at November 24, 2020, the Company's issued and outstanding shares and options remained unchanged from September 30, 2020.

Financial Instruments

As at September 30, 2020, the fair value of all of the Company's financial instruments approximates their carrying value. Certain financial instruments are exposed to the following financial risks:

Credit risk

Credit risk is the risk of an unexpected loss by the Company if a customer or third-party to a financial instrument fails to meet its contractual obligations. The Company's financial instruments that may have credit risk consist primarily of cash and cash equivalents and receivables. The Company's cash and cash equivalents are held by financial institutions with an A (low) credit rating. The Company may invest excess cash, if any, in guaranteed investment certificates until it is required. The Company's receivables are mainly comprised of GST receivable and therefore credit risk is minimal. The Company has gross credit exposure at September 30, 2020 relating to cash and cash equivalents and receivables of \$70,298 (December 31, 2019 - \$117,494).

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach is to forecast future cash flows to ensure that it will have sufficient liquidity to meet its obligations when due.

As at September 30, 2020, the Company is committed to current liabilities of \$13,538 (December 31, 2019 - \$15,662) with working capital of \$58,472 (December 31, 2019 - \$102,398). The existing working capital is sufficient to fund the minimum expenditures the Company must incur to sustain its operations beyond 2020.

As at September 30, 2020 all of the Company's mineral property claims are in good standing. As at December 31, 2019, the Company was committed to incurring expenditures during 2020 on certain mineral properties, to keep these claims in good standing. Due to the global COVID-19 pandemic, the Government of Saskatchewan recently waived expenditure requirements for the current term and subsequent twelve months for active mineral claims and leases. As a result, the Company is no longer required to incur expenditures on certain of the Company's mineral properties during 2020 to keep these claims in good standing.

The further exploration, evaluation and/or development of exploration and evaluation properties in which the Company holds interests or which the Company acquires may depend upon the Company's ability to obtain financing through equity issues or other forms of financing. Although the Company has been successful in the past in obtaining financing, there can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favorable. Failure to obtain additional financing on a timely basis may cause the Company to postpone exploration plans, forfeit rights in its properties or reduce or terminate its operations.

Market risk

Market risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market risk is comprised of four types: foreign currency risk,

interest rate risk, commodity price risk and equity risk. The Company currently does not have significant exposure to any market risks.

Accounting Changes

New IFRS standards, amendments and interpretations effective during the period

At the date of authorization of these consolidated financial statements, the IASB has issued the following new standards which became effective for the relevant reporting periods.

IAS 1 – Presentation of Financial Statements and IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors

In October 2018, the IASB issued amendments to IAS 1 – Presentation of Financial Statements and IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors to align the definition of “material” across the standards and to clarify certain aspects of the definition. The objective of this amendment is to improve disclosure effectiveness in the financial statements by improving the understanding of the existing requirements rather than to significantly impact an entity’s materiality judgements. The amendments apply prospectively to annual periods beginning on or after January 1, 2020, with earlier application permitted. There was no significant impact from the adoption of these amendments.

There are no other IFRSs or IFRIC interpretations that have been issued and are not yet effective that are expected to have a material impact on the Company.

Outlook

The Company has focused exploration efforts on its northern Saskatchewan properties with known gold mineralization located in the La Ronge Gold Belt. The Company is assessing future options for the Company's Jojay, Munro Lake and Jasper gold properties. The Company will also continue to evaluate the potential for the acquisition of other mineral properties that fit the Company’s strategic direction.

Risks and Uncertainties

The Company attempts to mitigate risks by identifying, assessing, reporting and managing risks of significance. The following are risks relating to the business of the Company. This information is only a summary of risks currently facing the Company based on its stage of development. Additional risks and uncertainties not presently known may also impact the Company's operations. Management’s view on risks facing the Company will evolve as the Company’s stage of development progresses.

The principal risks faced by the Company during the exploration stage involve: Wescan's ability to obtain financing to further the exploration and development of exploration and evaluation properties in which Wescan holds interests; obtaining the required permits from various federal, provincial and local governmental authorities; and the ultimate economic feasibility of any future development projects.

The further development and exploration of exploration and evaluation properties in which Wescan holds interests or which Wescan acquires may depend upon Wescan's

ability to obtain financing through equity financing, debt financing or other means. The Company does not have sufficient funds to put any of its property interests into production from its own financial resources. There is no assurance that Wescan will be successful in obtaining required financing as and when needed. Failure to obtain additional financing on a timely basis may cause the Company to postpone development plans, forfeit rights in its properties or reduce or terminate its operations. Reduced liquidity or difficulty in obtaining future financing could have an adverse impact on Wescan's future cash flows, earnings, results of operations and financial condition. The relative prices of applicable commodities and future expectations for such prices have a significant impact on the market sentiment for investment in mining and exploration companies.

The future operations of the Company, including exploration activities and potential development of its properties, require permits from various federal, provincial and local governmental authorities. Failure to comply with applicable laws, regulations, and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. To the best of the Company's knowledge, it is operating in compliance with all applicable rules and regulations. The Company utilizes qualified individuals, service providers and external consultants and maintains communications with governmental authorities to ensure that the Company is in compliance with all applicable rules and regulations.

All of Wescan's exploration and evaluation property interests are currently in the exploration stage and are without a known body of commercial ore. The exploration, development and production of precious metals are capital-intensive, subject to the normal risks and capital expenditure requirements associated with mining operations. While the rewards can be substantial if commercial quantities of precious metals are found, there can be no assurance that Wescan's past or future exploration efforts will be successful, that any production therefrom will be obtained or continued, or that any such production which is attempted will be profitable. To ensure that exploration procedures are being performed effectively and those results are interpreted and reported in a proper manner, management ensures that qualified individuals, service providers and external consultants are utilized in the verification and quality assurance of analytical results.

A local epidemic or a major global pandemic (e.g. COVID-19) could have a material adverse impact on the Company's ability to operate due to worker absences, supply chain disruptions, information technology system constraints, government interventions, market volatility and overall economic uncertainty. There can be no assurance that a local epidemic or a major global pandemic will not impact the Company's personnel and ultimately its operations. The Company's operations depend on uninterrupted supply of key consumables, equipment and components, which may be impacted by matters outside of the Company's control or ability to mitigate. These conditions may include global events such as the COVID-19 pandemic which may impact the Company's operations.

Technical Information

All technical information in this report has been prepared under the supervision of Mark Shimell, P.Geol, Vice President of Exploration, Professional Geoscientist in the Province

of Saskatchewan, and is the Company's "Qualified Person" under the definition of National Instrument 43-101.

Caution Regarding Forward-looking Information

This MD&A contains forward-looking statements within the meaning of certain securities laws, including the "safe harbour" provisions of Canadian Securities legislation and the United States Private Securities Litigation Reform Act of 1995. The words "may," "could," "should," "would," "suspect," "outlook," "believe," "plan," "anticipate," "estimate," "expect," "intend," and words and expressions of similar import are intended to identify forward-looking statements, and, in particular, statements regarding Wescan's future operations, future exploration and development activities or other development plans contain forward-looking statements. Forward-looking statements in this MD&A include, but are not limited to, the ability to raise funds to meet commitments and pursue exploration activities, the use of such funds, future plans for the Jojay, Jasper and Munro Lake properties and the acquisition and exploration of additional properties.

These forward-looking statements are based on Wescan's current beliefs as well as assumptions made by and information currently available to it and involve inherent risks and uncertainties, both general and specific. Risks exist that forward-looking statements will not be achieved due to a number of factors including, but not limited to, developments in world gold markets, risks relating to fluctuations in the Canadian dollar and other currencies relative to the US dollar, changes in exploration, development or mining plans due to exploration results and changing budget priorities of Wescan, the effects of competition in the markets in which Wescan operates, impact to the markets in which Wescan operates and to the Company's activities due to the continued spread of COVID-19, the impact of changes in the laws and regulations regulating mining exploration and development, judicial or regulatory judgments and legal proceedings and operational risks and the additional risks described in Wescan's most recently filed annual and interim MD&A, news releases and technical reports. Wescan's anticipation of and success in managing the foregoing risks could cause actual results to differ materially from what is anticipated in such forward-looking statements.

Although management considers the assumptions contained in forward-looking statements to be reasonable based on information currently available to it, those assumptions may prove to be incorrect. When making decisions with respect to Wescan, investors and others should not place undue reliance on these statements and should carefully consider the foregoing factors and other uncertainties and potential events. Unless required by applicable securities law, Wescan does not undertake to update any forward-looking statement that may be made.

Further information relating to the Company has been filed on SEDAR and may be viewed at www.sedar.com.

WESCAN GOLDFIELDS INC.

Notes to the Condensed Interim Consolidated Financial Statements

For the three and nine months ended September 30, 2020

(In Canadian dollars)

1. Corporate information

Wescan Goldfields Inc. was originally incorporated as Shore Resources Inc. under the *Business Corporations Act of Alberta* on January 17, 2003 and by amended articles dated April 2, 2004 changed its name to Wescan Goldfields Inc. (“Wescan” or the “Company”). Substantially all of the Company’s efforts are directed to the exploration and future development of its current exploration properties. Wescan is located at 600 – 224 4th Avenue South, Saskatoon, Saskatchewan, Canada, S7K 5M5.

2. Basis of preparation

The condensed interim consolidated financial statements of Wescan for the three and nine months ended September 30, 2020 were authorized for issue by the Company’s Audit Committee on November 24, 2020. These financial statements have been prepared in accordance with International Accounting Standard (“IAS”) 34 *Interim Financial Reporting* and do not include all of the information required for full annual financial statements. The Company’s financial statements have been prepared on a historical cost basis, except as disclosed, using the Company’s functional currency of Canadian dollars.

3. Going Concern

These financial statements are prepared on the assumption that the Company will continue as a going concern and realize its assets and discharge its liabilities and commitments in the normal course of business. Management is aware, in making its going concern assessment, of material uncertainties related to events and conditions that cast significant doubt upon the Company’s ability to continue as a going concern. As at September 30, 2020, the Company had working capital of \$58,472. While the existing working capital is sufficient to fund the minimum expenditures the Company must incur to sustain its mineral claims and operations beyond 2020, the ability of the Company to continue as a going concern and fund general and administrative expenses in an orderly manner will require further equity issuances or other forms of financings. In March 2020, the World Health Organization declared a global pandemic related to the novel coronavirus known as COVID-19. The duration and magnitude of the impact on the economy and equity markets are not known at this time. An extended disruption to equity markets may affect the Company’s ability to obtain additional financing. There is no assurance that the Company will be successful in obtaining required financing at an acceptable cost as and when needed or at all. Failure to obtain additional financing on a timely basis may cause the Company to postpone exploration and/or evaluation plans, forfeit rights in its properties or reduce or terminate its operations.

These financial statements do not include any adjustments to carrying values and classification of asset amounts and liabilities, reported expense and the statement of financial position classifications used, that would be necessary if the going concern assumption were not appropriate.

4. Summary of significant accounting policies

The accounting policies applied by the Company in these condensed interim consolidated financial statements are the same as those disclosed in Note 4 of the Company’s consolidated financial statements for the year ended December 31, 2019. Accordingly, the condensed interim consolidated financial statements should be read in conjunction with the consolidated financial statements for the year ended December 31, 2019.

5. Use of estimates and judgment

In preparing these condensed interim consolidated financial statements, the significant judgments made by management applying the Company’s accounting policies and the key sources of estimation uncertainty are the same as those disclosed in note 5 of the Company’s consolidated financial statements for the year ended December 31, 2019. In particular, the significant areas of estimation uncertainty considered by management in preparing the consolidated financial statements are: reserve and resource estimation, environmental rehabilitation provisions and share-based payment transactions.

6. IFRS standards, amendments and interpretations

(a) New IFRS standards, amendments and interpretations effective during the period

At the date of authorization of these consolidated financial statements, the IASB has issued the following new standards which became effective for the reporting period.

IAS 1 – Presentation of Financial statements and IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors

In October 2018, the IASB issued amendments to IAS 1 – Presentation of Financial Statements and IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors to align the definition of “material” across the standards and to clarify certain aspects of the definition. The objective of this amendment is to improve disclosure effectiveness in the financial statements by improving the understanding of the existing requirements rather than to significantly impact an entity’s materiality judgements. The amendments apply prospectively to annual periods beginning on or after January 1, 2020, with earlier application permitted. There was no significant impact from the adoption of these amendments.

At the date of authorization of these consolidated financial statements, there are no other IFRSs or IFRIC interpretations that have been issued and are not yet effective that are expected to have a material impact on the Company.

7. Exploration and evaluation expenses

The Company’s exploration and evaluation expenses incurred during the nine months ended September 30, 2020 and September 30, 2019 are comprised of the following:

	September 30, 2020	September 30, 2019
Exploration and evaluation expenditures	\$ 200	\$ 7,695
Total	\$ 200	\$ 7,695

8. Share capital and reserves

The authorized share capital of the Company consists of an unlimited number of common shares. As at September 30, 2020 the Company had 45,084,320 shares outstanding. No common shares were issued during the nine months ended September 30, 2020 and September 30, 2019.

Nature and purpose of reserves

Warrant reserve

On certain issues of common shares, the Company has issued warrants entitling the holder to acquire additional common shares of the Company. The warrant reserve is used to recognize the fair value of outstanding warrants. If the warrant is exercised or expires the fair value is transferred to share capital or contributed surplus, respectively. During the nine months ended September 30, 2020 and September 30, 2019 no warrants were issued or expired.

Contributed surplus

Contributed surplus is used to recognize the fair value of equity-settled share-based payment transactions. The fair value of these securities is added to contributed surplus over the vesting period of the securities. Upon exercise, the corresponding fair value related to the security is removed from contributed surplus and added to share capital. Should the security go unexercised, the fair value will remain in contributed surplus. The fair value of warrants and broker warrants related to securities that go unexercised is transferred out of the respective reserves into contributed surplus.

9. Share-based payments

The Company has established a share option plan, as approved by the shareholders, whereby options may be granted to directors, officers, employees and service providers to purchase common shares of the Company. Options granted have an exercise price of not less than the closing price quoted on the stock exchange on which the shares are traded on the day prior to the date on which the options were granted. Certain options vest

immediately while others vest up to twenty-four months after grant date and all options granted under the plan expire five years from the date of the grant of the options. All options are to be settled by physical delivery of shares. During the nine months ended September 30, 2020 and September 30, 2019 no options were issued or expired.

At September 30, 2020, total options outstanding were 4,190,000 (2019 - 4,190,000) at a weighted average exercise price of \$0.06 (2019 - \$0.06). Options outstanding at September 30, 2020 have exercise prices that range from \$0.05 to \$0.08 (2019 - \$0.05 to \$0.08) and a weighted average contractual life of 1.6 years (2019 - 2.6 years). The options expire between the dates of May 2021 and June 2023.

10. Related party transactions

Related party transactions with key management personnel

Key management personnel are persons responsible for planning, directing, and controlling the activities of an entity, and include executive and non-executive directors. The Company pays certain of its key management personnel through companies owned by certain executive officers and directors. Those companies are as follows:

MacNeill Brothers Oil and Gas Ltd.

During the nine months ended September 30, 2020, key management personnel waived their management and consulting fees. Total compensation paid to key management personnel, including amounts paid or payable to related parties owned by key management personnel, executive officers and directors, was \$0 (2019 - \$0).

11. Financial instruments

Fair values have been determined for measurement and/or disclosure purposes based on the fair value hierarchy for financial instruments that require fair value measurement after initial recognition. The classification of each financial instrument is described in note 4 of the December 31, 2019 consolidated financial statements.

The carrying amounts for cash and cash equivalents, receivables, and trade payables approximate their fair value due to the short-term nature of these instruments. These financial instruments are carried at amortized costs.

The Company does not have any financial instruments measured at fair value.

Risk management

Certain financial instruments are exposed to the following financial risks:

(a) Credit risk

Credit risk is the risk of an unexpected loss by the Company if a customer or third-party to a financial instrument fails to meet its contractual obligations. The Company's financial instruments that may have credit risk consist primarily of cash and cash equivalents and receivables. The Company's cash and cash equivalents are held by a financial institution with an A (low) credit rating. The Company may invest excess cash, if any, in guaranteed investment certificates until it is required. The Company's receivables are mainly comprised of GST receivable and therefore credit risk is minimal. The Company has gross credit exposure at September 30, 2020 relating to cash and cash equivalents and receivables of \$70,298 (December 31, 2019 - \$117,494).

(b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due.

As at September 30, 2020, the Company is committed to current liabilities of \$13,538 with working capital of \$58,472. The existing working capital is sufficient to fund the minimum expenditures the Company must incur to sustain its operations beyond 2020.

As at September 30, 2020 all of the Company's mineral property claims are in good standing. As at December 31, 2019, the Company was committed to incurring expenditures during 2020 on certain mineral properties, to keep these claims in good standing. Due to the global COVID-19 pandemic, the Government of Saskatchewan recently waived expenditure requirements for the current term and subsequent twelve months for active mineral claims and leases. As a result, the Company is no longer required to incur expenditures on certain of the Company's mineral properties during 2020 to keep these claims in good standing.

The further exploration, evaluation and/or development of exploration and evaluation properties in which the Company holds interests or which the Company acquires may depend upon the Company's ability to obtain financing through equity issues or other forms of financing. Although the Company has been successful in the past in obtaining financing, there can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favorable. Failure to obtain additional financing on a timely basis may cause the Company to postpone exploration plans, forfeit rights in its properties or reduce or terminate its operations.

(c) Market risk

Market risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market risk is comprised of four types: foreign currency risk, interest rate risk, commodity price risk and equity risk. The Company currently does not have significant exposure to any market risks.
